- Experience in **Server-Side application** development using **PHP**, **SLIM framework**, **OAuth 2.0** authentication, **token**, **filesystem**.

- Experience in writing **SQL** queries to retrieve data from the database and management of **MySQL** database.

- Well experienced in debugging websites using **Firebug** and **Chrome Developer tools**.

- Managing **technical integration** with **third-party services**. (ex. PayPal, Razorpay, ZipRecruiter, etc)

- Experience **in Responsive Website design** - ensuring **cross-browser, cross-platform,** and **multiple device type compatibility**. Also making sure the website functions properly for **SEO** and doing technical changes related to it.

- Knowledge of utilizing cloud technologies - Amazon Web Services (AWS) like **ElasticSearch**, **SES**(simple email service), etc.

- First-rate understanding and exposure of working on multiple financial services products like **Debit**, **Credit**, Merchant Management System(**MMS**), and **Switch**.

CERTIFICATIONS

JavaScript Algorithms & Data Structures - FreeCodeCamp

Developer Certification, representing approximately 300 hours of coursework in Javascript, ES6, Debugging, Data Structures, Algorithm Scripting, Object-oriented and functional programming.

Responsive Web Design - FreeCodeCamp

Developer Certification, representing approximately 300 hours of coursework in HTML, CSS, Visual Design, CSS Flexbox and CSS grids

TECHNICAL SKILLS

Web Technologies : Javascript, React.JS, Redux,HTML5, CSS3, JSON, XML, SQL, PHP, Webpack, Moment.js, Wordpress, JEST.Js

Development Tools: Sublime 3.0, Visual Studio Code, Querious

Debugging Tools: Firefox and Chrome Developer Tools

Databases: MySQL

Version Control Systems: Github

Operating Systems: macOS, Windows, Linux.

EXPERIENCE

1. CVViZ Softwares, Mumbai—*Software Engineer*

NOVEMBER 2017 - PRESENT

Role: Full Stack Developer

PROJECTS

CVViZ App (Product Development)

Project Name: CVViZ App   **Duration**: Nov 2017 - Present

Role Played: Participated in the full lifecycle of the development of the CVViZ App. Designing, Developing and managing web application, database, and APIs from development to deployment

Description: CVViZ is an Artificial Intelligence powered, a cloud-based online recruitment software solution for talent acquisition.

Responsibilities:

- Involved in various phases of SDLC using Agile Methodology
- Conceptualization and design of the UI
- Front end and UI Development using React JS & Redux
- Writing reusable components in react
- Restful APIs Design and Development
- Server-side development using PHP
- Unit testing using JS library JEST.js
- Writing optimized SQL queries to retrieve data from the database
- Third-party integrations (Google, Outlook, RazorPay, etc.)
- Jobs feed integration with many popular job boards
- Ensuring cross-browser, cross-platform, and multiple device type compatibility in the website
- Making sure the website functions properly for SEO

Achievements & Highlights:

- Received appreciation from the senior management team for resolving many critical production issues in a shorter notice and for optimizing the app's performance by using ElasticSearch (AWS).

- Migrated old CVViZ front end from PHP based web app (Material design) to React app using ant design which helped us reusing the existing components code and saving a lot of time for writing higher-order components.

- Worked with the marketing team to optimize the SEO score which helped increase the website traffic by around 300% within the span of 6 months.
